ULTRA ROBOT ARM LOCK TDX-XX

The highest performance and Premium design!

Inherited anti-theft robotic arm joint mechanism, uses special alloy tool steel for the main body. The arm section is heat-treated to the core to ensure hardening strength, and the insertion shaft is also heat-treated, realizes extremely high resistance to impact. The arm section and the lock shaft section are strongly fastened with steel rivets, and the key cylinder block uses highly durable hard stainless alloy steel.

With sophisticated premium design, protecting your precious car safely for a long time.

ULTIMATE SECURITY LOCK ! RELEASED IN MID-OCTOBER!!
