INSTALLATION ILLUSTRATION -

HOW TO INSTALL

- 1) Remove side cover (L) bolt (A / B / C). Before removing side cover, spray (lubrication) to a gap between floor and side cover. Therefore it ease to remove side cover because it is slippy. Pull (A / B) cover lightly. After pull, move side cover a little bit left side, and pull out not to break cover claw.
- 2) Cut the inner fender (E) on the illustration II by cutter knife. (Cutting part is from inside, dotted line on illustration II, easy to find because streaks appear due to embossing.)
- 3) Remove inner fender (D) bolt.

BRACKET

4) Install side stand main unit to vehicle side bracket from cut place referring to illustration III. Tighten side stand that installed while pulling inner fender to forward with spring washer (8mm) and

nut (8mm) from a gap between floor and inner fender.
5) Put inner fender back as illustration II, tighten (D) bolt.

Make sure the inner fender cut out place does not touch side stand. If it touches, please shave.

6) Put the side cover (L) back, tighten (A / B / C) bolt to finish installation.
